

App Spotlight: Thinglink (www.thinglink.com)

To begin, sign up for a free account and then click on the create button.

Use this site to modify images with clickable areas for user interaction.

Browse for the image you would like to use.

Upload images from your hard drive

[About image upload >](#)

+ Choose images >

Open the image and click somewhere to open the editor. Then you can choose to link to a website or insert text.

A screenshot of the "EDIT TAG" interface. It features a text input field for "Link or image address", a "Text" input field with "B / I / H" icons, and a "Tag styling" section with a note that settings are available to premium users only. At the bottom, there are "CANCEL" and "SAVE TAG" buttons.

Share the image with a common app, by distributing a link, or embedding the image onto a webpage of your choosing.

A screenshot of the "Share this image" interface. It shows social media sharing icons for Facebook, Twitter, Pinterest, Google+, and Email. Below these is a "Link" field containing the URL "http://www.thinglink.com/scene/5961". There is also an "Embed" section with an "Iframe embed" checkbox and a code block containing the embed code. A "COPY CODE TO CLIPBOARD" button is located below the code. At the bottom, it says "Powered by ThingLink".
